Calls

Calls on this phone are first shown from 19/06/14 which indicates that this is the not the phone/Sim that port was using at the time of Walgate's death.

Images

There are 229 images stored on the device, with many being repeated images of X1 X1

2.2.3. Summary of evidence relating to devices seized from Stephen Port

There are messages on Port's laptop BSG/9 between Port and various persons in which by Nov 2013, Port states he has used drugs during sex. There is relevant internet history and google searches on this device between 13/06-26/06/14. This shows Port viewing date rape porn, then contacting Walgate on 13/06/14 to make arrangements to meet via the Sleppyboys escort website. Over the next few days, Port watches more date rape porn and views various news articles about rape, including directly before and after viewing Walgate's photos and videos on xtube.

Port's phone CSP/1, contains a SIM with the 07903854105 number associated to it. Reading the WhatsApp strings and SMS it appears Port first starting using this handset on the afternoon of 19/06/2014 the day of the finding of Walgate's body and used it up until 26/06/2014 which was the day Port was arrested and this handset taken from him. This would indicate Port had another phone during the lead up to and the time of death of Walgate which has not been recovered by police or has been disposed of by Port. The Whatsapp message between Port and X1 indicate that Port was going to pick up drugs in anticipation of a meeting with X1 within 48 hrs of Walgate's death.
