SUBMISSION OF WORK FOR SCIENTIFIC EXAMINATION

Circumstances of Incident(s)

Date(s): 19-06-2014

Time(s): 04:00

Location: Cooke Street, Barking, Essex

Offence: Other Crime - Record Only - Unexplained Death

a) What took place:

The subject of this application was found deceased outside of a block of flats in Cooke Street, Barking, Essex in unexplained circumstances. It is believed that he had met the occupier of 62 Cooke Street for sex at the venue.

A Special Post Mortem has been conducted and can not confirm the cause of death.

b) What account (if any) has been given by the suspect(s):

The last known male to meet with the deceased has stated that the deceased had been inside his premises, and that the deceased had taken a quantity of poppers (Amyl Nitrate). He states that they then had consensual sex and that the deceased vomited and went to sleep. He states that he then went to work asking the deceased to let himself out. He stated upon returning that the deceased was still in his premises so he dragged him outside and called the LAS.

c) Other information considered relevant (refer to 'Critical Success Factor Form' where appropriate):

Please can this be treated as a priority as at this stage there is no cause of death in regards to the deceased and a suspect is on bail.

The deceased was in possession of what we believe to be Amyl Nitrate or similar (POPPERS) which according to his friends he would use on a regular basis, due to his lifestyle as a male prostitute.

SUBMISSION OF WORK FOR SCIENTIFIC EXAMINATION

Items for Scientific Examination

All items must be properly packaged and labelled to preserve the integrity of the evidence (The exhibit number and description given below must correspond with the exhibit label)

Table with 8 columns: Exhibit No., Exhibit Bag No., Description of Items, Taken From, Date found/taken, Time, Name of person seizing item. Includes entries for RLB/01 (Laptop) and BSG/09 (Toshiba Laptop).
