5.1.2. Summary of evidence relating to devices seized from Jack Taylor

There is no pornography, references to Taylor being gay or references to drugs found on his computer. The laptop has limited use since 20/07/15 when user access was created. The last login was on 13/09/2015 01:21:53 and this was followed by a number of websites visited on Firefox regarding SIA and getting licensed for security work and then Apple. It would appear that Taylor set up 'find my Iphone' prior to leaving the house to go and meet with Port. The last activity recorded was at 02:16hrs.
