On another note, Can we establish Kavari's address and search it please.

In relation to the below, Can we get the work enquiry done as a matter of priority? If it is down to toxicology then I see no reason to keep the body. We can wait and see after the cctv like you say. I don't think we should keep it until tox is received unless it is fast tracked and will be with us in a week or 10 days

Sir,

Any thoughts? I am unsure as to how long we need to retain Whitworth's body. SC&O1 are advising to hold onto it until after Toxicology is back (which may be some time) and this may raise problems with the family.

I am currently minded to retain the body until CCTV, statements and anniversary visits have been done and decide then. Phone work and toxicology will take a long time, and I am considering what is proportionate.

I'd be grateful for your opinion.

Thanks,  
Rolf

Hi Sir

At present the labs are extremely backed up and this has not been deemed urgent so is likely to take some time to come back (I am a FLO on another job and it took 15 weeks to get results and the body still hasn't been released). How do you want me to play this with the family. At present They know its unexplained and likely to be suicide. The following points could be tricky with regards to family.

- Dad Adam has seen part of suicide note to verify Daniels writing, he has already asked to see the full note. I believe he suspects there is more detail of what happened and feels we are withholding information.
