Dear Jaqueline,

Let me be more blunt.

I have heard that Gabriel and the young guy who died in the same churchyard (Daniel?) were present at the same gay chem-sex party the weekend before Gabriel died. I have had indirect information about the 'party' and this person described a scenario in which older men, drug younger men, in order to take advantage of them sexually. Four young men have died of "unexplained" deaths in Barking between June 21st and September 22nd. Gabriel being the 2nd.

It would be great if I could talk to you or any other officer involved in the case about this.

Best,  
- John

Dear Jaqueline,

It has been two months now since I heard any information about how Gabriel died. It's been a busy couple of months at work and I have tried to move on. But recently I have myself thinking about Gabriel more and wondering what might have happened. Yesterday I found out about a 3rd man found dead, unexplained in Barking within a month of Gabriel.

If you include the unexplained death of a 23 year old male on June 21st that's 4 x unexplained deaths of young men in Barking in the space of three months. I find that very hard to get my head around. Especially when I am told by Gabriel's former boyfriend that Gabriel and the man who was found in the same churchyard were present together at a chem-sex party the weekend before Gabriel's death.

I know I am not next of kin to Gabriel, but if you can have a whirlwind romance then I feel like for the 6 weeks he was with me we had a whirlwind friendship. So I feel like I need to know more, for my own closure and also because I worry about what is happening to young men in Barking.

You can call me at anytime.
